

IMPROVER'S TRAINING PLAN

Improver's training plan

This training plan is for runners who may have already completed a marathon and are looking to improve on a previous performance. The plan assumes you will run four times a week at the start of your training and that you've done plenty of running in the past. The days of the week shown are not fixed and only proposed, so you can complete your sessions at the times that suit you best.

Different types of training run

EASY RUNS (less than 60 per cent maximum effort)

During an easy run, you should feel relaxed. You should be breathing comfortably and capable of holding a conversation throughout the run. If you're a new runner nothing may feel easy at first – slow down, walk if necessary and control your effort.

STEADY RUNS (60-70 per cent maximum effort)

These are the bread and butter of your training – the 'miles in the bank'. Steady runs build the base that is the foundation for the rest of your training. Conversations are still possible at this pace but only in shorter sentences.

TEMPO RUNS (70-80 per cent maximum effort)

Running at tempo pace is great for improving your running economy. It's a sustained cruise pace that requires concentration. You will find these runs slightly uncomfortable as you try to run faster, but they are worth it.

LONG RUNS

These are a real focus of the plan. They should be used to develop strength and endurance but also to practise your target marathon pace and control. Long runs are shown in both time and distance.
